

Till Sex Do Us Part

Make Your Married Sex Irresistible

Trina Read

Countless women all over the world are trying to keep it sexually together while still living a busy life. They are at their wits end to understand why, if they love their partner and get along so well, a healthy sex life is so hard to manage. Lack of sex for most women (and as author Trina Read maintains) not really enjoying sex any-more in a happy relationship, is the shameful sexual secret for far too many super busy women.

Till Sex Do Us Part: Make Your Married Sex Irresistible will shift the busy woman's perspective from seeing sex as a major cause of relationship stress, to seeing sex as a positive, integral and welcome aspect of her relationship. It will be used by women to eliminate any negative emotional baggage they have built up, as they move away from single woman and forward into having married-woman sex. Written in a fun and accessible style, the book will teach the reader how to regain the positive sexual momentum in any marriage.

"Trina Read is a person of passion. Her own life experience was helpful. She helped me to better understand and develop my self esteem and to follow my goals and dreams."

Oakland, CA

"I just wanted to let you know that you were wonderful! I was there with two of my co-workers and we had a great time. We felt such a sense of sisterhood, it was fantastic. Thank you again for sharing all of your experiences with us, that makes such a huge impact."

Oakbrook, IL

"Thank you for a great seminar today! I thoroughly enjoyed myself, and more importantly, I was reminded to also love and care for myself, so that I can enjoy the pursuit of my dreams and make them come true. Thanks for sharing your life, experiences and talent with us today."
